

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (currently amended) An electric double layer capacitor, comprising:

electrodes which include activated carbon particles, a binder binding said activated carbon particles, and an electrolytic solution,

wherein an averaged diameter of said activated carbon particles is in the range of 5 micrometers to 13 micrometers, and a particle size distribution thereof is in the range of 2 micrometers to 20 micrometers.

2. (original) The electric double layer capacitor as claimed in claim 1, wherein a specific resistance of said electrodes is in the range of  $2.0\Omega\text{cm}$  to  $7.0\Omega\text{cm}$ .

3. (cancelled)

4. (original) The electric double layer capacitor as claimed in claim 1, wherein said binder contains a fluor-containing polymer.

5. (original) The electric double layer capacitor as claimed in claim 1, wherein said binder contains polyvinylidene fluoride.

6. (currently amended) An electric double layer capacitor comprising:

a separator;

a pair of electrodes separated by said separator, and said electrodes including activated carbon particles and a binder binding said activated carbon particles; and

a pair of collectors separated by said pair of electrodes,

wherein a density of said electrodes is in the range of 1.4 g/cm<sup>3</sup> to 1.8 g/cm<sup>3</sup>,

wherein an averaged diameter of said activated carbon particles is in the range of 5 micrometers to 13 micrometers, and a particle size distribution thereof is in the range of 2 micrometers to 20 micrometers.

7. (original) The electric double layer capacitor as claimed in claim 6, wherein a specific resistance of said electrodes is in the range of 2.0Ωcm to 7.0Ωcm.

8. (cancelled)

9. (original) The electric double layer capacitor as claimed in claim 6, wherein said binder contains a fluor-containing polymer.

10. (original) The electric double layer capacitor as claimed in claim 6, wherein said binder contains polyvinylidene fluoride.

11. (currently amended) An electrode including:  
activated carbon particles; and  
a binder binding said activated carbon particles,  
wherein a density of said electrodes is in the range of  
1.4 g/cm<sup>3</sup> to 1.8 g/cm<sup>3</sup>, and

wherein an averaged diameter of said activated carbon  
particles is in the range of 5 micrometers to 13 micrometers, and  
a particle size distribution thereof is in the range of 2  
micrometers to 20 micrometers.

12. (original) The electrode layer capacitor as  
claimed in claim 11, wherein a specific resistance of said  
electrodes is in the range of 2.0Ωcm to 7.0Ωcm.

13. (cancelled)

14. (original) The electrode as claimed in claim 11,  
wherein said binder contains a fluoro-containing polymer.

15. (original) The electrode as claimed in claim 11,  
wherein said binder contains polyvinylidene fluoride.

16. (cancelled)

17. (previously presented) The electric double layer  
capacitor as claimed in claim 1, wherein a density of said  
electrodes is in a range of 1.4 g/cm<sup>3</sup> to 1.8 g/cm<sup>3</sup>.

18-20. (cancelled)
